Bubble cloud level 104

If you have a new device and you want to continue playing from where you left off, there are a few options depending on your platform (iOS or Android): on iOS: the easiest way to transfer your progress from one device to another is by enabling iCloud on your devices. Be sure to install the latest version of the game on your old device, and you've enabled iCloud in the device settings for both devices. Your progress must be automatically synchronized when you first open the game on your new device. Please note that this option is only available during the first launch and no further progress made after installation will be synchronized. On iOS and Android: Another option is to restore your entire device from a backup. If you restore your new device from a backup of the old device, you must automatically transfer your progress level to the new device, bubble cloud and all other applications as well. If you have tried the above options and are still unable to restore your progress, please let us know we may be able to help you. If I delete the game and reinstall it later, has my old progress been restored?no. If you delete the game, your progress is lost so you are not keen to delete the game if you think there is a chance that you will play again in the future. Why isn't my progress on the devices synchronized? Unfortunately, this feature is currently not implemented in our game. We are working hard to implement this feature in one of the upcoming releases. Sorry for the inconvenience. Can I pause the game and continue playing at a later level? Yes. If you go to ⓧs sling down and press off II while running a level, you will be able to continue playing where you left off later. I've passed level 22 many times but I still cant go to the next level. What's wrong? In order to proceed to the next level, you need to collect more stars from previous levels. If you scroll to the top of the map screen, you'll see a text that tells you how many stars you need to collect. Go back to the levels that you've already played but where you haven't won all three stars and play them again. For example, if you have passed Level 5 with one star and restart it with 3 stars, you will get 2 stars more. Once you have collected the desired number of stars you will be able to go the next level. Where did infinity levels go? Due to some technical limitations, we had to remove infinity levels in version 1.9.56 and above. We are currently monitoring feedback to see if there is widespread interest to get them re-executed, so please let us know if you are missing them! Why do the colors of bubbles that line up change sometimes? This may occur when all specific color bubbles are removed from the cloud, it will not return. What are laser cycles? Bubble Cloud contains two different types of special boosters that help you succeed, called laser and super spins. The purpose of the laser is to help you on the target. If you hold down your finger while you are shooting the next bubble, the laser will show the exact path that will take the bubble - even after bouncing from the walls. The laser mode of the green button can be activated with the target code in the game. The purpose of super spin is to spin bubbles quickly and remove all bubbles that touch the wall. This will make it easy for you to continue the game in difficult situations. You can use super spins in the game on the screen to continue playing on a level after you have lost the level by hitting the wall. How do stars work? Between some levels in the map screen there is a wall that prevents you from advancing more unless you have enough stars. This is the only purpose of the stars, you can not use the stars for anything else. If you pass a level by hitting the glass in the middle of the screen, your level will be recorded as completed. You will always get recorded with at least one star of this level. If you have cleared more than

50% of all bubbles before hitting the glass, your finish is recorded with two stars. And if you manage to clear all the bubbles of the level, it becomes a three-star finish. For your overall star progress, only the highest achievement in each level is done. For example, if you've completed the level before with one star, and you've completed that level with a two-star pass, the total number of stars increases by one. To get more stars, you must find some levels that you've only got 1 or 2 stars on the previous completion, and complete with 2 or 3 stars. I have a question that has not been answered above. How can I contact you? For feedback or unanswered questions above in FREQUENTLY asked questions, you can reach us via iPhone - iPad Home Games / iPhone - iPad / Sub Menu Boxshot & DetailsDeveloper: TeamlavaPublisher: TeamlavaPublishre: ActionRelease: Jun 15, 2012ESRB: Not Set Question & Answer Answer from: AnonYou need to be connected with black stones before opening but does anyone know how to get the first 3 + bubbles? Posted on: November 22, 2012 Answer: Bubble Girl for most of it works on other bubble stick to gray blocks to hold them in place before opening the series. I still can't figure out how to get the very first ones that don't fall... Hopefully someone will figure it out. Posted on: November 22, 2012 Answer from: Skye I think the first plus bubbles are there as a distraction. Sometimes, the game is set up to give you false clues and you can find out later that there is another better way. I could be wrong about these but the chain breaks what's around and there's no possible Posted on: November 28, 2012 Answer From: SkyChain 1 - Everything Explodes. Decide between your first two colors which will be better after the series explodes. Series 2 - Don't explode everything. Prepare for plus bubbles, open chain, get plus bubbles, clear row. Series 3 - Everything explodes. Series 4 - Setup for Bubbles Plus, color match before if you can, pop plus bubbles, clear row. Series 5 - In addition to bubbles you will stick to series 6. You don't need to set up before series 6 - setup for bubbles plus. In addition, in addition to the bubble usually matches the nearby top bubble in the final bubble section and you can pop those together. Posted on: November 28, 2012 Answer: Gamegirl having the same case - can't set up any + bubbles to stay except for one group (group that has already docked.) hope to figure it out!
